Instructions

PUNCH/CHAMPAGNE FOUNTAIN

NOTE: Please use a pulp-free beverage only, so the fountain does not clog.

1. Cool beverage before filling. When fountain is running, the pump will slightly warm the liquid over time so additionally we recommend freezing and ice ring or juice cubes to keep the beverage cold.
2. Fill the fountain with 5 gallons of beverage. (more or less depending on size of fountain)

IMPORTANT NOTE: Please refill fountain often. Do not let the fountain run dry.

3. Plug the machine into an outlet to start the pump.

NOTE: Operating capacity may fall if the fountain is not used on a separate outlet.

WARNING: DO NOT IMMERSE THE BASE OF THE FOUNTAIN IN WATER. To Clean, run warm water through the fountain and wipe down with a soft cloth.
